

ADD IMAGE TARGETS

In this step, we upload an image on to which the `imageTargetAnchor` script, you added in step 5, will anchor Sumerian entities.

For this workshop you can use [this picture of a business card](#) (ask for the relative physical business card in case).

Otherwise you can upload your own image as target.

If needed you can read the 8th Wall documentation for [adding an image target](#)

You can add more than one image if you want, for example, if you want your video quad to be anchored to your re:invent badge also. In this case, just take a picture and upload it.

Note

Crop your image so that it does have lesser empty space as possible.

After upload, flag **Load Automatically** in order to activate the usage of this image as target.

Metadata (optional) Format: ☐ Text ☒ JSON

```
{ "value": "https://example.com", "color": "blue" }
```

☒ Load automatically
