

CONFIGURE SCRIPT

The script defines a parameter, videoURL, that's used to specify the video's URL using the Sumerian Editor.

In the script, this parameter is referenced by args.videoURL and is exposed as **Video Url**. Copy the public URL of your uploaded video in this box.

To add your video url:

- Select the videoQuad:
- Navigate to the Inspector panel.
- Expand the Script component.
- Paste your url in the text box.
