

GET THE APP KEY

Now we need to retrieve the 8th Wall APP KEY.

Open the project settings and copy the value of **MY APP KEY**

The screenshot shows the 8th Wall Project Dashboard. The top navigation bar includes 'Features', 'Learn', 'Support', and a user profile 'woody Borraccino'. The main header displays 'PROJECT DASHBOARD cyupvgxj / avr303-sumerianwebapp' with buttons for 'Device Authorization' and 'Open Editor'. A sidebar on the left contains icons for the 8th Wall logo, a cube, code, share, target, and settings. The dashboard content includes:

- IMAGE TARGETS:** 1 image targets, with a 'Manage Image Targets' link.
- QR 8.CODE:** A message stating 'Your web app will not be publicly visible until you upgrade to Agency or Business >'. Below this is a section to 'Connect a URL to generate a QR 8.Code' with a text input field containing 'https:// example.com' and a 'Connect' button.
- RECENT TRENDS:** A section stating 'Your project has 0 views in the last 30 days.' with tabs for 'Total' and 'Daily'. A line chart is partially visible below the tabs.
