

CREATE 8THWALL DEVELOPER ACCOUNT

Now that we have our AR scene hosted privately in an React webapp, we need to integrate the 8th Wall JavaScript library to take care of `image tracking` and `SLAM`.

Note

If you already have an 8thWall account you can just login and proceed to next step.

It's free to set up an **8th Wall developer account**.

First of all you need to create an [8thWall account here](#).

Provide all information needed and proceed with the account creation.
