TEST THE VIDEO

If you open the link in a browser, Amazon S3 will show a link for the item. Clicking the link will open the item, and the movie will begin to play.

> ℹ Note
>
> If you see an XML error message like the one below, you need to make sure the bucket and video file both have public permissions. This can be done in the Permissions tab of your S3 bucket.

This XML file does not appear to have any style information associated with it. The document tree is shown below.
